

Chemistry 121 Midterm

Format -	Multiple Choice	15 marks
	Problems/Calculation/short Answer	65 marks
	Matching	20 marks

Chapters Covered

Ch 22 Intro Organic

Ch 23 Organic Families and Reactions

Ch 17 Thermochemistry(your notebook supplements this Chapter quite a bit,
so make sure you rely on your notes as well)

Study Tips

- Test Review Sheets-You have one for each unit and have hopefully made up some type of review in preparation for your tests.
- Problem handouts/Practise questions You received several during each unit which you can now use to Practice specific types of questions that you need to improve on.
- End of Chapter questions-There are content review questions organized by section in the textbook, Concept questions which have practice problems, cumulative review questions AND Standardized test prep questions which contain multiple choice practice. This textbook has been designed for writing standard tests in the United States so it has excellent review questions and some of the answers are provided in the back.
